Full Stack Developer with 4+ years of hands-on experience designing, developing, and implementing applications and solutions using a range of technologies and programming languages. Seeking to leverage broad development experience and hands-on technical expertise in a challenging role as a Full-stack Developer.

Professional Experience

Full Stack Developer

Innover Srl | January 2021 - Present

Main activities and responsibilities:

- Participating in client meetings to understand requests related to additional features to be added in existing dynamic web-pages and devising plan to complete tasks before deadline
- Assisting to integrate open-source and third-party applications into existing systems, and maintaining quality assurance standards
- Designing, developing, and maintaining dynamic websites and web applications for various clients, including corporate, e-commerce or educational institutions
- Coordinating with developer team to write small coding modules as well as debugging and executing them to deliver expected outputs
- Troubleshooting, testing, and maintaining web applications as well as database to ensure strong optimization and functionality
- Developing custom modules for different CRM, and assisting to write custom web programs using PHP framework as per the requirements
- Helping to write technical documents during entire product development life-cycle, and preparing accurate reports for submitting it to the project manager

Web Developer

CodianSoft | January 2018 - November 2020

Main activities and responsibilities:

- Attended monthly team meetings to understand client requirements, and sent regular updates about project status to immediate head during software development life-cycle
- Worked with developers to troubleshoot, test and maintain software products and databases to ensure strong optimization as well as functionality
- Performed integration of user-facing elements of programs written by front-end developers and assisted to build efficient, testable as well as reusable PHP modules
- Designed dynamic websites according to client requirements and wrote appropriate PHP program scripting commands to ensure accurate data is retrieved from database
- Developed and deployed new features in existing web applications to facilitate related procedures and tools when necessary
- Coordinated with the developer team to write code modules using HTML/CSS, JavaScript, SQL and PHP
- Performed debugging and testing of the developed software applications, and ensured the product delivers expected results
